

Athletic Clothing Prices

Tanishi Datta and Kaydence Lin
Northeastern University

- This dataset explores different athletic clothing brand prices
- We focused on exploring the prices based on material, category, and size
- The boxplot contains price distribution of all the brands
 - The user can select the material and category they want to observe from the dropdown
 - When you hover over the boxplot, it gives insight to the descriptive statistics
- The histogram contains price frequency of all the clothes
 - The user can select the size they want to observe from the slider
 - The user can select which materials they want to observe
